Version 1.0

Do you believe in legends?

Ages past it was said, Gargoyles, winged beasts of sculpted rock, preyed upon Viking marauders in the shadows of night.

Protecting Scotland's fortresses from atop stronghold walls, these majestic creatures thwarted the evils of men. But when the sun rose above the edges of the earth each day, the Gargoyles returned to a frozen state – flesh into stone once more.

Beware nonbelievers!

The myth of a thousand years ago lives on. Gargoyles are rumored to lurk deep within the streets of Manhattan. Amidst a world where good and evil are no longer black and white but shades of gray, Gargoyles stand poised to vanquish modern day barbarians.

To the pure of heart, fear not the black of night. For in your quest to uphold all that is good in this world, know that you are not alone.

Production Still Caption:

*"Gargoyles"*, the Walt Disney Company's first dramatic animation series, presents a new daytime programming concept for the "Disney Afternoon" television line-up.

Sleeping in stone by day but heroes of the New York night, this band of warriors, led by the mighty Goliath, struggle to maintain a code of honor in an alien time and place.

With the same quality elements of Disney animation: strong characters, compelling storylines, humor, and heart, *"Gargoyles"* weaves mystery, suspense, action, and adventure with contemporary twists and brings to life a fascinating tale of the stone sentinels that have adorned European castles and cathedrals for centuries.
